Letter of IAREP President

By Erik Hölzl

Dear IAREP members: In this newsletter, you will find a huge amount of announcements, compiled by Căzilia Loibl in her new role as secretary. Please take particular note of the calls for proposals included in this newsletter – one for organizing a summer school, the other for

organizing workshops. We would be happy to receive your proposals! This year, we had a great conference in Rishon LeZion, Israel, and I would like to express my gratitude to the organizers. In case you were not able to attend the 2017 conference, please consider renewing your 2018 membership individually. We are already looking forward to the next conference in London 2018, and we hope to see all of you there!

Reports

1. IAREP General Assembly

By Tomasz Zaleskiewicz

Minutes taken at Rishon LeZion, Israel, September 5th, 2017, Executives present: Erik Hoelzl (President), Tomasz Zaleskiewicz (Honorary Secretary), Leonhard Lades (Honorary Treasurer), Martin Kocher (Editor of Journal of Economic Psychology), Stefan Schulz-Hardt (Editor of Journal of Economic Psychology)

Welcome: Erik Hölzl welcomed all GA attendees. Minutes of the 2016 GA in Wageningen, The Netherlands were accepted.

Journal of Economic Psychology Editorial Report: Martin Kocher presented the Journal of Economic Psychology Editorial Report. Number of submissions was presented (619 in 2016). Positive development of the impact factor: Current IF is 1.275; 5-year-IF is 2.222. Information on special issues: 2017 – “Understanding Behaviour in Contests: Views from Economics, Psychology and Biology” and “Stability of Preferences”; 2018 – “Uncovering dishonesty”, and “Application of sports data to study decision making”. New Associate Editors are presented. Martin thanked editors who finished their work in the Journal. Martin also introduced new journal publisher – Thomas Thayer. Finally, the plan to collaborate with an Elsevier initiative to publish a Special Issue targeted at “Replications” in 2019 was discussed.

Treasurer report: Leonhard Lades presented the Treasurer’s Report and informed about the surplus of £6,008.22 as a result of the conferences in 2016 and 2017. One workshop (Ownership) was sponsored by IAREP in this period with the expense of €2540.95. Leo thanked the organizers of the IAREP/SABE conference in Wageningen for transferring the conference surplus to IAREP.

Funding activities: Questions from the audience addressed how Brexit would affect IAREP management and whether IAREP might support PhD students in paying the conference fees. Proposal of funding activities was presented: Summer school (€3000), Workshops (€3000), Conference promotion (€3000), Web site improvement (€1000). No objections of the GA about the funding activities proposal for 2017/18.

Upcoming conferences: 2018 SABE/IAREP conference presentation was given by Erik Hölzl on behalf of Pablo Branas. Conference will take place in London, UK. Conference dates: 19-22 July

2018. Liam Delaney presented information on the IAREP conference in Dublin, Ireland in 2019. Conference dates: 1-4 September 2019. Both proposals were accepted by the majority of GA participants (21 in favor, 1 abstained). Erik Hölzl presented, on behalf of Ellen Nyhus, the proposal to organize the 2020 IAREP conference in Kristiansand, Norway in the middle of June. Voting on this issue was postponed to the next year GA in London.

Report on the election results: Erik Hölzl presented results of the electronic voting for the three IAREP board positions: President elect (Candidate: Rob Ranyard) – 44 members in favor, 3 abstained; Honorary secretary (Candidate: Căzilia Loibl) – 42 members in favor, 5 abstained; Honorary treasurer (Candidate: Agata Gasiórowska) – 44 in favor, 3 abstained. Erik introduced new board members and thanked outgoing members – Ellen Nyhus, Tomasz Zaleskiewicz, and Leonhard Lades.

Other business: Christine-Roland Levy informed about the upcoming International Congress of Applied Psychology in Montreal, Canada, in June 2018.

2. 2017 IAREP Conference in Rishon le Zion, Israel

<https://goo.gl/WS5S1v> (Conference pictures)

By David Leiser and Tal Shavit

Dear friends and colleagues, as organizers of the IAREP 2017 Conference in Israel, we feel pleased with the event, and wanted to thank again to all those amongst you who contributed to make it a success. There was a good attendance despite the distance, the program was rich and interesting with 23 oral presentation sessions and one devoted to posters. The three keynote speakers were as interesting as we hoped, and from the feedback we received, it seems that the social program (including the mini-boat trip) was appreciated. If you want to remember the event, or are curious to see the pictures, here is the link to the pictures (organized by days) <https://goo.gl/WS5S1v>. Cheers, and looking forward to meet you next summer!

3. Journal of Behavioral and Experimental Economics

<https://www.journals.elsevier.com/journal-of-behavioral-and-experimental-economics/>

By Ofer Azar, Ben-Gurion University of the Negev

The Journal of Behavioral and Experimental Economics views research in economic psychology as one of its main areas of interest, and I encourage IAREP members to submit their best work to the journal. I provide below some recent information about the journal. The 2016 edition of Journal Citation Reports (JCR) was recently released, reporting an impressive improvement over last year for the Journal of Behavioral and Experimental Economics: the regular 2-year impact factor has increased from 0.34 to 0.809. However, the impact factors reported by JCR do not take into account the title change in April 2014, from the Journal of Socio-Economics (JoSE) to the Journal of Behavioral and Experimental Economics (JoBEE). JCR does not combine the data from the two titles but rather analyzes them separately and reports two impact factors, for JoSE and JoBEE. In JCR 2016, the JoSE impact factor (1.286) is based on citations in 2016 to the

February 2014 volume. For JoBEE the impact factor (0.809) is based on citations in 2016 to the five last volumes of 2014 and the six volumes of 2015.

The correct computation is to combine the data for the two titles of JoSE and JoBEE because it is the same journal. This gives 119 citations in 2016 of the 143 articles published in 2014-2015 by JoSE and JoBEE. The resulting combined impact factor is then $119/143 = 0.832$. If we omit from the JCR data the two separate titles and add the combined title, its impact factor would rank 186 out of 346 economics journals (54th percentile). This represents a significant improvement from last year, when the combined title had an impact factor of 0.541 and was ranked 248/344 (72nd percentile).

One should remember, however, that JCR is selective in its coverage and many economics journals are not included in it; these percentiles are among the economics journals in JCR and not among all economics journals. The historical impact factors for the Journal of Economic Behavior and Organization (JEBO) and the Journal of Economic Psychology (JoEP) show that the impact factor of 0.832 for JoBEE is similar to the impact factors of JEBO and JoEP about a decade ago.

The total number of citations to JoSE in 2016 is 1369, and to JoBEE it is 127. It should be noted that the large gap in the number of citations between JoSE and JoBEE results from the fact that JoSE was published a much longer time than JoBEE, thus having far more citable articles. Together these 1496 citations ranked the combined journal at 114 out of 346 economics journals (33rd percentile). Since JCR does not combine data after a title change, this number does not include citations to the title that preceded JoSE and existed in 1972-1990, the Journal of Behavioral Economics, so the true number of citations to the journal including its original title is even higher. More details appear in the table below.

Table: Impact factors and total cites in JCR 2016 for JoSE, JoBEE, and combined

		<i>JoSE</i>	<i>JoBEE</i>	Combined
A	Cites in 2016 to articles published in 2014	9	51	60
B	Cites in 2016 to articles published in 2015	0	59	59
C=A+B	Cites in 2016 to articles published in 2014-2015	9	110	119
D	Number of articles published in 2014	7	47	54
E	Number of articles published in 2015	0	89	89
F=D+E	Number of articles published in 2014-2015	7	136	143
C/F	Impact factor in 2016	1.286	0.809	0.832
	Rank of impact factor in 2016 (in economics)	119/347	191/347	186/346
	Total cites in 2016	1369	127	1496
	Rank of total cites in 2016 (in economics)	Irrelevant	Irrelevant	114/346

Call for Proposals

4. IAREP/SABE Summer School Behavioral Economics and Economic Psychology

http://www.iarep.org/index.php?option=com_content&view=article&id=52&Itemid=67

By Cäzilia Loibl and Behnud Mir Djawadi, Honorary Secretaries

IAREP and SABE dedicate up to 6,000 Euro to sponsor a joint Summer School, to take place in 2018. Instructors in the Summer School should strike a fair balance between economists and psychologists. The Summer School typically hosts about 20 PhD students and early-career faculty, also about equally divided between the two disciplines. The Summer School is expected to cover one week of instruction and to be scheduled during summer months. We encourage applicants to apply for matching funding from other sources. IAREP or SABE members who are interested in organizing a Summer School are requested to submit their proposal to Behnud Mir Djawadi (behnud.mir.djawadi@uni-paderborn.de) and Cäzilia Loibl (loibl.3@osu.edu) by December 20, 2017. Both organizations will then evaluate any proposals received. Please include in your proposal: Title of Summer School; Names of organizers; Location and dates of Summer School; Target audience and how it will be recruited; Learning objectives and outline of content to be taught; Names of presenters; Amount requested; and Sources and amounts of matching funds.

5. IAREP Workshops in Economic Psychology

By Cäzilia Loibl, IAREP Honorary Secretary

The IAREP Managing Committee is happy to announce a Call for proposals to organize workshops in economic psychology. We particularly encourage proposals that link economic psychology with other fields within behavioural science, such as behavioural economics and judgement and decision-making. We also favour proposals with clear benefits for IAREP and the field of economic psychology, for example in the form of special sessions at a IAREP conference. IAREP will dedicate up to 3000 Euros to sponsor workshops taking place in 2018. We encourage you to apply for further funding from other sources. Besides the financial support, we are happy to provide assistance in organizing the event. IAREP members who are interested in organizing this activity are requested to submit their proposal to Cäzilia Loibl (e-mail: loibl.3@osu.edu) by December 20, 2017. The IAREP Managing Committee will then evaluate any proposals received.

6. Journal of Economic Psychology Special Issues

<https://www.journals.elsevier.com/journal-of-economic-psychology/>

By Martin Kocher & Stefan Schulz-Hardt, Co-Editors-in-Chief

The Journal of Economic Psychology invites proposals for up to two Special Issues of the journal, to be published in 2019. Special issues of the journal comprehensively cover topics that are currently of particular relevance in the field of economic psychology, and/or that are

insufficiently understood yet (the general scope of the journal can be found at: <http://www.journals.elsevier.com/journal-of-economic-psychology/>). The proposals should contain a brief outline of the chosen topic (maximum one page) together with a list of potential authors who might be interested in contributing to the special issue, and short curricula vitae of the guest editors (maximum one page per guest editor) – all in one pdf file. Proposals (or potential questions) should be submitted via e-mail to joep@econ.lmu.de. Deadline for submissions is December 22, 2017. Decision of acceptance of proposals will be made by the editors of the Journal of Economic Psychology until the end of January 2018.

Upcoming Conferences, Seminars, and Courses

7. 2018 SABE/IAREP Conference

<http://www.sabeconomics.org/news/sabe-iarep-meeting-2018/>

SABE/IAREP 2018 will be organized by Pablo Brañas Garza (branasgarza@gmail.com) at Middlesex University London. Conference dates: 19-22 July 2018. Conference website and call for papers are to be issued soon!

8. 2019 IAREP Conference

http://www.iarep.org/index.php?option=com_content&view=article&id=48&Itemid=63

The 2019 IAREP conference will be in Dublin, Ireland. The main local organizer is Liam Delaney (liamdelaney2011@gmail.com). Conference dates: 1-4 September 2019

9. 2018 Conference of the French Association for Experimental and Behavioral Economics

<https://asfee2018.sciencesconf.org/>

The upcoming conference of the French Association for Experimental and Behavioral Economics (AsFEE) will take place in Nice (France), June 14-15th, 2018. Guest speakers are: Richard Sugden (University of East Anglia, UK) and Friederike Mengel (University of Essex, UK). Deadline for submissions of extended abstracts: 17 March 2018. Contact: Agnès Festré (agnes.festre@gredeg.cnrs.fr).

10. VI International Seminar: Political and economic self-constitution: Citizenship activity and education

<https://amice13.github.io/bondarevskaia/>

By Irina Bondarevskaya, National Academy of Educational Sciences of Ukraine

Psychologists, political scientists, historians, anthropologists and economists are invited to discuss the following topics: Citizenship activity and citizenship education; Media psychology and media education; Migration and diversity; Corruption; Public opinion on political and economic issues; Psycho-economic aspects of organizational activities and positive organizational behavior; Entrepreneurship psychology and psychology of consumer behavior;

Political and economic consciousness and socialization; Psychology of richness and poverty; money, income and savings attitudes; Social representations paradigm for research in political and economic psychology; Educational basis of political and economic consciousness development; Psychological well-being as a precondition for economic development; and Role of history and culture in self-constitution of a person.

Conference details:

Location: University of Warmia and Mazury in Olsztyn on 5 June 2018 in Olsztyn, Poland

Deadline for submissions: 20 April 2018

Seminar language: English

Submissions should be saved in MS WORD and emailed to: dniropsy@yahoo.com

Participation fee: 30 Euro, covers seminar proceedings publication

Seminar proceedings will be published in English with ISBN

Travel, meals and accommodation are to be paid by participants. Registered participants will receive information about travel, meals and accommodation in Olsztyn.

Submission guidelines:

1200-1500 words, please avoid footnotes, figures, and bibliography

References should be inserted in the text (surname, year).

At the beginning of the submission, state authors' names, degree, title, position, affiliation

Theoretical studies should include: 1) introduction, 2) objectives, 3) results, 4) conclusions

Empirical studies should include: 1) introduction, 2) objectives, 3) method and procedure, 4) results, 5) conclusions. These sections should be clearly separated in the text.

Contact information:

10. Research Master in Neuroeconomics

<https://www.maastrichtuniversity.nl/education/master/research-master-cognitive-and-clinical-neuroscience> or <http://researchers-sbe.unimaas.nl/neuroeconomics/>

By Matthias Wibrals, Maastricht University

The Research Master in Neuroeconomics at Maastricht University is a world-wide unique two year, selective, internationally oriented program designed for excellent students who wish to continue their graduate studies in preparation for a career in research. The entire program is taught in English. The Research Master in Neuroeconomics is a truly interdisciplinary endeavor and jointly organized by the Faculty of Psychology and Neuroscience (FPN) and the Economics Departments of the School of Business and Economics (SBE). Students will receive a PhD level

in-depth training in quantitative theoretical and empirical methods in economics, game theory, and cognitive neuroscience as well as extensive hands-on training in all aspects of experimental and neuroscience research. The program combines methodological training with theoretical and experimental approaches from economics, psychology, and neuroscience to study human decisions in all its aspects. Excellent research internship opportunities will be offered at Maastricht University as well as at prestigious universities and institutions in Europe and North-America. In previous years students have been placed for internships at CalTech, MIT, UCL, Cambridge, Oxford, University of Bonn, and the Social Science Center Berlin, amongst others. Graduates of this program have been continuing their PhD in areas ranging from applied statistics to psychology, neuroeconomics, and behavioral economics. Beginning of the next program is September 2018; application deadlines are January 14, 2018 (first-round and scholarships) and March 31, 2018 (second round).

Recently Published Books and Special Issues

11. The Cambridge Handbook of Psychology and Economic Behaviour (2nd edition)

<https://www.cambridge.org/core/books/cambridge-handbook-of-psychology-and-economic-behavior/B00988202D60EC40C5C34EBF2619B2DF#fndtn-information>

By Alan Lewis, University of Bath

Publisher: Cambridge University Press

Expected online publication date: December 2017

Print publication year: 2017

Online ISBN: 9781316676349

There has recently been an escalated interest in the interface between psychology and economics. The Cambridge Handbook of Psychology and Economic Behaviour is a valuable reference dedicated to improving our understanding of the economic mind and economic behaviour. Employing empirical methods - including laboratory and field experiments, observations, questionnaires and interviews – the Handbook provides comprehensive coverage of theory and method, financial and consumer behaviour, the environment and biological perspectives. This second edition also includes new chapters on topics such as neuroeconomics, unemployment, debt, behavioural public finance, and cutting-edge work on fuzzy trace theory and robots, cyborgs and consumption. With distinguished contributors from a variety of countries and theoretical backgrounds, the Handbook is an important step forward in the improvement of communications between the disciplines of psychology and economics that will appeal to academic researchers and graduates in economic psychology and behavioral economics.

12. Boost! How the Psychology of Sports Can Enhance Your Performance in Management and Work

<https://global.oup.com/academic/product/boost-9780190661731?cc=us&lang=en&#>

By Michael Bar-Eli, Ben-Gurion University of the Negev

Publisher: Oxford University Press

Publication date: November 2017

ISBN: 9780190661731

Boost! is the first book of its kind to breakdown the complex behavioral science of getting ahead. Through original scientific research, unique case studies, and anecdotes from the world of sports and beyond, author and internationally recognized sports psychologist Dr. Michael Bar-Eli explains the psychological underpinnings of human behavior and how we can harness this knowledge to perform at our highest levels, succeeding in our careers and personal lives. To perform better in any situation—in one’s career, hobbies, relationship, or any other facet of life—it is critical to develop psychological skills, which, just like physical abilities, can be taught, learned, and practice. Both as individuals and as groups, people can tone their psychological skills and use them to heighten awareness, foster talents, and reach peak performance. This type of mental preparedness and psychological awareness are the keys to thriving in any environment. For more than 35 years Bar-Eli has not only researched the science of performance but has also worked directly with elite athletes, coaches, and teams to help them improve their success on the court or field. Boost! takes the lessons he’s learned and translates them for readers and managers at any stage in their career. With prescriptive advice, intriguing anecdotes, and original research Bar-Eli illustrates how anyone can apply these lessons to better support and inspire co-workers and employees and create a sustainable, successful working life.

13. Advanced Introduction to Behavioral Economics

<http://www.e-elgar.com/shop/advanced-introduction-to-behavioral-economics>

By John F. Tomer, Manhattan College

Publisher: Edward Elgar Publishing

Publication Date: 2017

ISBN: 978-1-78471-991-3

This book covers the key areas of behavioral economics, including Herbert Simon’s bounded rationality, Daniel Kahneman and Amos Tversky’s psychological economics, behavioral finance, nudging and public policy, behavioral macroeconomics, law and behavioral economics, neuroeconomics, and empirical methods of behavioral economics. The author also explores how and why behavioral economics emerged and differs from neoclassical economics.

14. Economic Psychology

<http://www.wiley.com/WileyCDA/WileyTitle/productCd-111892634X.html>

Edited by Rob Ranyard, Leeds University Business School

Publisher: Wiley-Blackwell

Publication Date: August 2017

ISBN: 978-1-118-92634-5

Economic Psychology presents an accessible overview of contemporary economic psychology. The science of economic mental life and behavior is increasingly relevant as people are expected to take more responsibility for their household and personal economic decisions. The text will, in addition to reviewing current knowledge on each topic presented, consider the practical and policy implications for supporting economic decision-making. Economic Psychology examines the central aspects of adult decision-making in everyday life and includes the theories of economic decision-making based on risk, value and affect, and theories of intertemporal choice. The text reviews the nature and behavioral consequences of economic mental representations about such things as material possessions, money and the economy. Written for students of psychology, Economic Psychology reviews the most important information on contemporary economic psychology with a focus on individual and household economic decision making, ranging widely across financial matters such as borrowing and saving, and economic activities such as buying, trading, and working.

15. Economic Psychology: An Introduction

<http://www.cambridge.org/de/academic/subjects/psychology/applied-psychology/economic-psychology-introduction?format=PB>

By Erich Kirchler, University of Vienna and Erik Hölzl, University of Cologne

Publisher: Cambridge University Press

Publication Date: November 2017

ISBN: 9781107040502

Economic Psychology is the only up-to-date, English-language textbook that provides a comprehensive overview of theoretical topics in economic psychology and their relevance in applied fields. Written by two leading psychologists, the book looks at how people make decisions on the use of scarce resources, in particular money, from a psychological perspective. Starting with decision making and lay theories as basic building blocks of economic behaviour, the authors go on to explore three major markets where economic behaviour occurs as an interaction between individuals and companies or institutions - consumer markets, labour markets and financial markets - before considering the challenges of collective cooperation and economic prosperity. Featuring numerous applied examples throughout, each chapter also includes an overview, a summary, figures, key terms, student questions and suggestions for further reading. This introduction is an essential resource for advanced undergraduate and postgraduate courses on economic psychology, behavioural economics and social psychology.

16. Special Issue “Sustainable Consumer Behavior”

http://www.mdpi.com/journal/sustainability/special_issues/consumer_behaviour

Edited by Gerrit Antonides, Wageningen University

Journal: Sustainability 2017, Volume 9, Issue 10

ISSN: 2071-1050

Sustainability may be achieved through many different agents and institutions in society, including governments, new technologies, industries, and markets. In addition to these agents, consumers and households play a crucial role in the adoption of sustainable products and technologies. Additionally, households are responsible for substantial proportions of energy use and waste. In the European Union, the end use of total energy by households was about 25% in 2014 (Eurostat, 2016). Additionally, households generated 8% of total waste in the EU in 2012 (Eurostat, 2015). Moreover, ethical aspects of consumption are becoming more and more important. In order to gain understanding of sustainable consumer and household behavior, Sustainability has devoted an entire Special Issue to this topic. The Special Issue includes studies focusing on macro- and meso-issues, such as political parties' positions, nationality, social dilemmas and collective consumer efforts. Others studies focus on micro-issues of consumer behaviour, such as consumer segmentation, consumer perceptions, opinions, and intentions. The studies employ a variety of methods, including surveys, experiments, eye tracking, and contingent valuation. The collection of studies provides a balanced overview of consumer research in the field of sustainability.

Focus: USA Country Representative Report By Harold Zullo

17. University of Toronto BEAR (Behavioral Economics in Action)

<http://www.rotman.utoronto.ca/FacultyAndResearch/ResearchCentres/BEAR/Events/BEAR-Webinar-Series>

The BEAR (Behavioral Economics in Action) program at the Rotman School of University of Toronto is presenting a webinar series. The next webinar is on December 9.

18. Harvard Business School Behavioral Decision Research in Management Conference

<https://bdrm2018.exordo.com/>

<http://www.hbs.edu/faculty/conferences/2018-behavioral-decision-research/Pages/default.aspx>

June 7-9, 2018, submissions due December 29, 2017

BDRM (Behavioral Decision Research in Management) is the leading conference for behavioral research with business and organizational implications. BDRM is held biennially and brings together the best of behavioral research within, but not limited to, the areas of decision-making, consumer behavior, experimental and behavioral economics, decision analysis, behavioral finance, organizational behavior, negotiation, behavioral strategy, behavioral operations research, behavioral accounting, and medical and legal decision making. Early registration opens on January 15.

19. 2017-2018 Behavioral Policy Speaker Series

<https://behavioralpolicy.princeton.edu>

The new Kahneman-Treisman Center for Behavioral Science & Public Policy at Princeton University is hosting its annual Behavioral Policy Speaker Series. The next scheduled talks are: November 28, Hunt Alcott: Regressive Sin Taxes-What is the Optimal Soda Tax? and March 29, Rebecca Wolfe (TBA).

20. Call for Special Issue on Nudges and Choice

<https://www.journals.elsevier.com/organizational-behavior-and-human-decision-processes/call-for-papers/call-for-papers-nudges-choice-architecture-organizations>

The journal Organizational Behavior and Human Decision Processes will publish a special issue on Nudges and Choice Architecture in Organizations. The submissions portal will be open between February 1 to June 1. Guest Editors for this special issue are: Katherine L. Milkman, University of Pennsylvania (Managing Guest Editor), Gretchen Chapman, Rutgers University, David Rand, Yale University, Todd Rogers, Harvard University.

21. Behavioral Evidence Hub (B-Hub)

<http://www.bhub.org/submit-a-study/>

Relevant studies that can be submitted for coverage on the B-Hub site include studies fostering "Financial Inclusion." Existing entries at B-Hub cover topics such as micro-lotteries, planning prompts, rules-of-thumb training, and various nudge interventions such as Commitment Savings Accounts. The site is sponsored by ideas42, in conjunction with partners such as Innovations for Poverty Action (IPA), the University of Pennsylvania Center for Health Incentives & Behavioral Economics, OECD, TechnoServe, and the Harvard Kennedy School's Behavioral Insights Group. The B-Hub puts new tools in the hands of individuals and organizations working across the globe to improve people's lives. The B-Hub is not an index of lengthy research papers; it's a curated collection of innovations. Each innovation describes a behavioral product or design that has been rigorously tested in the real-world, all with a rich collection of implementation details to make replication in your own context possible. For more information and to submit a study:

22. Behavioral and Experimental Economics of the Mid-Atlantic (BEEMA)

<http://crab.rutgers.edu/~smithj/BEEMA.htm>

BEEMA, a group of early-career behavioral and experimental economists in the Philadelphia area, will hold its next annual seminar to discuss current research and stimulate new research, on October 13. BEEMA is supported by the Mellon Foundation, SABE and IAREP.
